No statement has been made as to the European nations that are ordering guns, submarines, projectiles, etc., from the Bethlehem Steel Corporation,, but it can be surmised that Great Britain and France are the principle purchasers. The contracts will be pushed to completion as rapidly as possible.

The purchase of the Fore River Ship-building Company a year or two ago enables the Bethlehem Company to turn out a complete battleship, fully armored and equipped. The company will also work on the construction of submarines and other war vessels.

The products of the Bethlehem will be in use by nearly all of the belligerent European countries. A year or more ago the Bethlehem Steel Corporation sold a large number of guns to Germany, and these have already been mounted on battleships of that country. The Bethlehem has sold battleships to Greece in competition to the Krupps.

From now on the works of Bethlehem Steel and its allied companies will be beehives of activity, and the results are expected to be very profitable. It would not be surprising if the earnings of the current year compared favorably with 1913, when the surplus was equal to 7 per cent. on the preferred stock and over 27 per cent. on the common. However, this is merely an estimate.
